## The authority for a HEALTHY & PRODUCTIVE BEEF HERD

### Spring Ranger Hi-Mag

The authority for cattle grazing early spring pastures

- Elevated Magnesium level to combat grass tetany
- High levels of vitamins to aid in reproductive efficiency
- Chelated trace minerals included for reproductive efficiency

### Gestating Ranger

The authority for the early-mid gestating cow

- Highly-digestible to improve absorption of Calcium, Phosphorus, Magnesium, Potassium, Salt
- Maintenance level of vitamins and trace minerals to promote health and immune function
- Maintains cow liver status for minerals
- Provides minerals for fetal growth

### Breeding & Calving Ranger

The authority for the lactating and ovulating cow

- Formulated with higher levels of vitamins to maintain healthy eyes and tissues, and support immune function
- Chelated trace minerals included to promote reproduction
- Improves mineral absorption by preventing antagonists from tying up minerals

### Co-Product Ranger

The authority for cattle consuming by-products

- Formulated for needs of cattle consuming high phosphorus by-products
- Higher Calcium inclusion and removal of Phosphorus
- Thiamine added to balance high sulfur content of corn by-products
- Chelated minerals included
- Economical due to removal of Phosphorus

### Fescue Ranger

The authority for grazing endophyte fescue

- Binding agent fights negative effects of fescue toxicosis
- Increased levels of vitamin A & E to promote herd health
- Chelated minerals included
- Option of 6% or 2% Phosphorus to match forage Phosphorus in your area

### Stocker Ranger

The authority for growing stocker cattle

- Supports proper balance of Calcium, Phosphorus, Magnesium, Potassium, Salt
- Maintenance level of trace minerals to maximize growth potential
- Formulated with higher levels of vitamins to maintain healthy eyes and tissues, and support immune function
