# Family Flock POULTRY PROGRAM

## WE OFFER:

- Consistent formulation
- Only highly digestible ingredients that are properly balanced to match the specific needs of your poultry flock
- Balanced nutrition

We use specially designed vitamin-trace mineral add packs to ensure that each micro ingredient is properly balanced and in every ounce of feed. Formulas are designed to balance amino acids, as well as protein, fat, and fiber. The formulas are blended together so that the feed has the highest quality mix that will be consumed by the chickens. Our feeds do not only look good on paper, but also in the feed pan.

## ADVANTAGES:

- Healthy start
- Fast and efficient growth
- Strong finish
- Proper development
- Maximum egg production

# Family Flock CHICKEN PRODUCTS

## FAMILY FLOCK CHICK STARTER

**Family Flock Chick Starter** is specifically designed to be the first feed the chick eats. It is also designed to be the sole ration, so it has the proper levels of vitamins and minerals to build a healthy gut and strong feathers. The best combination of amino acids ensure that the first feathers are in excellent condition so future feathers will also grow in strong.

## FAMILY FLOCK CHICK GROWER

**Family Flock Chick Grower** is designed as the second feed the chicks will eat. It is very important to grow bones in the chicks, whether they are going to lay eggs or will be grown out for meat. Strong bones are an essential part of a healthy chicken. Family Flock Chick Grower has an excellent balance of the major minerals that provide calcium and phosphorous along with the necessary vitamins and micro minerals. Water is an important nutrient, so keep clean, fresh water available at all times.

## FAMILY FLOCK BROILER FINISHER

**Family Flock Broiler Finisher** is designed to put final weight on chickens before processing and is designed to provide the energy to keep chickens healthy during fast weight gain while building flavorful meat. About two weeks on finisher should get the results needed. The chickens will drink approximately 1 quart of water for every pound of feed they eat. Keep the bedding dry and clean, and provide good ventilation for fresh air.

## FAMILY FLOCK PULLET DEVELOPER

**Family Flock Pullet Developer** provides the proper balance of protein and energy along with the right amount of minerals and vitamins to grow the chickens effectively, without them becoming overweight. Give the chickens plenty of room to exercise and something to climb on. Provide roost space at this time – you want them in good physical condition for laying time.

## FAMILY FLOCK LAYER

**Family Flock Layer** is designed to give hens the proper protein and energy balance needed, along with calcium, so they can produce many eggs. There is no need to add extra calcium from another source. Keep clean, fresh water available at all times. Hens need a clean nest so be sure to provide plenty of nest choices for the chickens.
